PROFILE

Final-year Computer Science student with hands-on experience in backend system development, REST API engineering, automated workflows, and database reliability. Built and deployed multi-module platforms supporting 200+ concurrent users with real-time monitoring dashboards, JWT-secured APIs, and query-optimized databases. Certified in Oracle Cloud Infrastructure and Fortinet Cybersecurity, with strong scripting proficiency in Python and a foundation in distributed systems, incident detection, and operational tooling aligned with Site Reliability Engineering principles.

EDUCATION

SRM Institute of Science and Technology, B.Tech in Computer Science June 2022 – May 2026

- CGPA: 7.43/10 | Relevant Coursework: Operating Systems, DBMS, Data Structures, SDLC, Distributed Systems

PROJECTS

- Smart Coding Assessment & Analytics System** | Python, Flask, MySQL, OpenAI API Jan – May 2025
- Architected a full-stack assessment platform with real-time code execution, timer-based quiz orchestration, and auto-scoring pipelines, handling 500+ submissions with sub-2s response latency.
 - Engineered normalized MySQL schemas across 6+ tables for questions, submissions, analytics, and leaderboard records, eliminating data redundancy and accelerating query throughput by 35%.
 - Constructed live performance monitoring dashboards visualizing coding accuracy trends, submission error rates, and improvement metrics across 100+ student sessions, enabling data-driven intervention.
 - Automated assessment scoring and result dispatch workflows, reducing manual evaluation overhead by 80% and ensuring zero-downtime operation during peak concurrent usage.
- AI-Powered Interview Preparation Platform** | Python, Flask, MySQL, OpenAI API, JWT Feb – May 2025
- Developed a multi-role platform supporting student, faculty, and admin interfaces with JWT authentication, bcrypt password hashing, and API rate limiting to harden backend reliability.
 - Integrated OpenAI API for AI-driven mock interview simulations, processing 300+ evaluation requests with automated response scoring and structured feedback generation.
 - Implemented RESTful API endpoints across 5 modules (coding assessments, quiz management, analytics, company workflows, session tracking), improving cross-functional service interoperability.
 - Optimized backend database queries and request-handling pipelines, reducing average API response time by 40% and enabling seamless real-time assessment load management.
- Campus Recruitment System** | Python, Flask, MySQL Jan – May 2025
- Deployed a scalable multi-interface recruitment portal sustaining 200+ simultaneous users across administrator, recruiter, and applicant roles with zero reported downtime incidents.
 - Designed normalized relational database architectures managing 50+ job listings and 1,000+ application records, incorporating real-time eligibility filtering to streamline candidate shortlisting.
 - Streamlined candidate screening workflows via rule-based GPA filtering and automated tracking, slashing manual review time by 30% and matching 25+ companies with qualified graduates.
 - Leveraged data analytics on application pipelines to surface candidate-job compatibility insights, reducing time-to-offer by an estimated 20% through improved recruiter decision accuracy.

TECHNICAL SKILLS

Languages & Scripting: Python, JavaScript, SQL (query optimization, schema design)
Backend & APIs: Flask, REST APIs, JWT Authentication, API Rate Limiting, OpenAI API Integration
Monitoring & Reliability: Real-time Dashboards, Log Analysis, Incident Detection, Performance Profiling, Automation Scripting
Databases: MySQL, PostgreSQL, Normalized Schema Design, Query Optimization
Cloud & Security: Oracle Cloud Infrastructure, Fortinet Cybersecurity, Git, GitHub, Render, VS Code
Core Concepts: Site Reliability Engineering, Distributed Systems, OS, DBMS, SDLC, Cross-functional Collaboration

CERTIFICATIONS

Oracle Cloud Infrastructure Foundations – Oracle Mar 2025
Fortinet Certified Associate in Cybersecurity – Fortinet May 2025

ACHIEVEMENTS

- Scored **99.3%** in Class X and **89.3%** in Intermediate Education – demonstrating consistent analytical rigor and disciplined problem-solving across high-stakes academic assessments.
